DETAILED ACTION

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 16.

Specifically regarding claims 1 and 16, Dukes (3674371), deMey, II (4883356) and Carangelo et al. (5486917) teach the state of the art of mounting a child part to a parent part in regards to interferometers.

But, Dukes, deMey, II and Carangelo et al. fail to explicitly teach a combination of all the claimed features including a first center of expansion, second center of expansion and third center of expansion, determining a location of the third center of expansion of the base so the first center of expansion does not substantially move relative to the parent part under a temperature change and wherein the third center of expansion is located on a centerline defined by the first and second centers of expansion, as claimed.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph P. Martinez whose telephone number is 571-272-2335. The examiner can normally be reached on M-F 7:00 AM to 3:30 PM.
